California Immunization Registry Release Notes

1. Introduction

The document communicates the major new features and changes in this release of the California Immunization Registry.

2. About This Release

This release incorporates the correction of some minor defects discovered during the CAIR Implementation contract period and minor enhancements to the California Immunization Registry software.

3. Compatible Products

This product has been tested on the following platforms or with the following products:

CAIR UAT, CAIR TRN, CAIR Production

4. Bug Fixes

The following fixes appear in this release:

1. Reports
 - a. Fixed the Blue Card so TB X-Ray results are accurately reflected.
2. Date Exchange
 - a. Revised the 'Application record locked' ACK error code from 'E' to 'W'.

5. New Features

The following new features appear in this release:

Administration

1. Defaulting to the User Role of the logged in User, soft access interface
2. Updating Edit User to include Exact Search for Organization Selection.
3. Updating Search Result adding Role, Status, Create Date and Log-in Date and Email Address
4. Updating Edit User to display all Org Codes the user has accounts under and the creation date of the account, which is available by a Quick View User Roles icon.
5. Edit User/Modify added Activate All button that functions to activate all User Roles associated with a User.
6. Adding age at date of Vaccine Administration yy mm dd to Immunization History Page. Accessed by hovering over the date.

6. Known Bugs and Limitations
