

CAIR2

*California Immunization Registry*

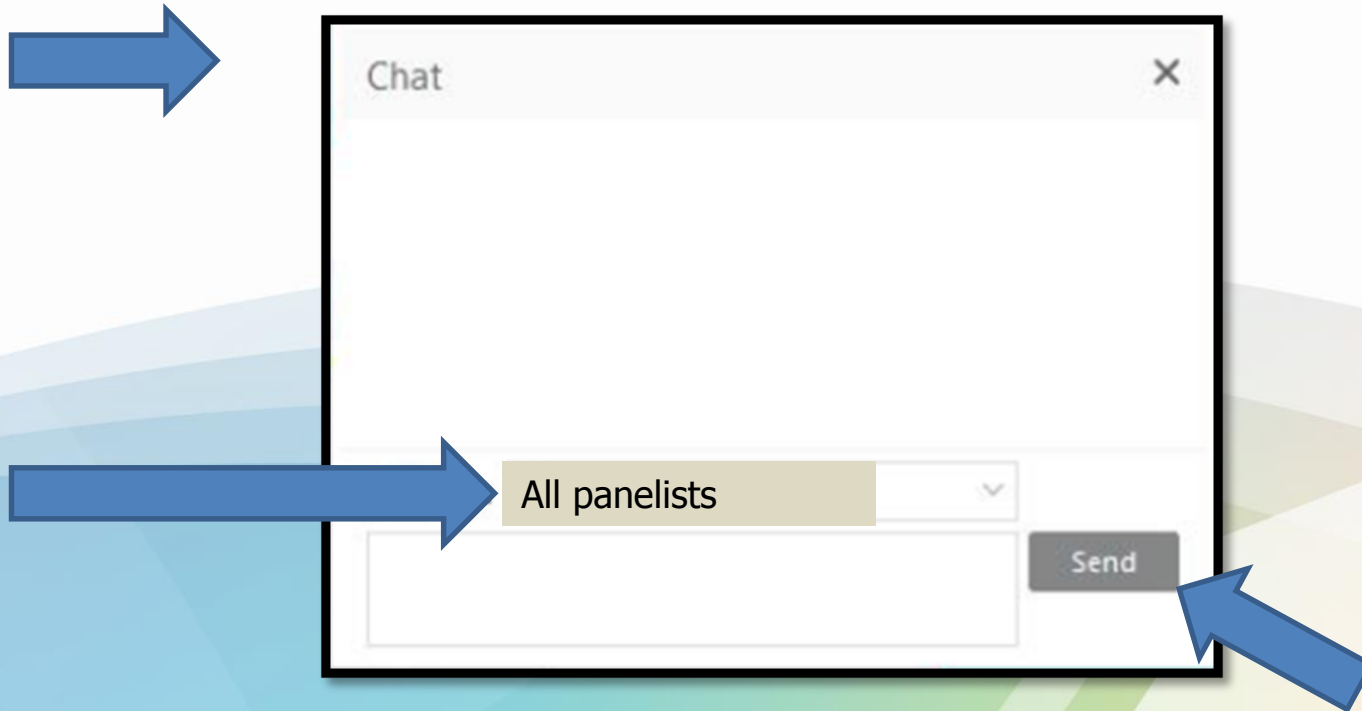

# CAIR2 User Group Meeting

September 27, 2018

# Chat Box

- Write down your questions in the Chat box as we move through the presentation

# Agenda

## **August 23rd Meeting Notes**

- Approve?

## **Prioritization of Improvements/Enhancements**

- Follow-up on feedback from the survey

## **Update on influenza, PCV13 and Shingrix recommendations**

- Review

## **Software release 2.5**

## **Open Forum**

- Questions

## **Adjourn**

**Next meeting:** Thursday, October 25th at 1:30 pm

# Meeting Minutes 8/23

- Edits or modifications
- Questions?
- Approve?

# Prioritization of Improvements/Enhancements Action Steps

## Consultations

1, 2

## Training

13, 40-42

## DXC

35-39, 49-52, 54

## Legal Department

55

# Prioritization of Improvements/Enhancements Action Steps

CAIR2 Steering Committee

5, 7, 11, 13-17, 19, 22, 24, 29

# Prioritization of Improvements/Enhancements Action Steps

- Upcoming release

6, 10, 18, 20, 26, 28, and 56

# Prioritization of Improvements/Enhancements Action Steps

- In Progress

24, 30, 34, 44

# Prioritization of Improvements/Enhancements Action Steps

Completed

**4, 12**

Guidance from CDC

**21**

Future enhancement

**27, 48**

Account Update

**33, 47**

# Prioritization of Improvements/Enhancements Action Steps

## Creation of Workgroup

31. Require VFC providers to use CAIR2

?????

8 & 9

# Immunization Algorithm Update

- Influenza recommendations for current flu season are being tested
  - CDPH met with DXC to go over algorithm and test patients 09/21/18
- PCV13 for adults and Shingrix
  - Have meeting set up with CDPH and DXC on 10/03/18 to go over scenarios prior to coding and testing

# Release 2.5

- Currently in testing
- Release date pending on test results
- Mostly DX items
  - ACK for LOINC code '30963-3' error to be corrected
  - New QAK code added when sending an RSP while querying a protected record
  - Corrects QBP error when an org code submitted in MSH-22 but the patient does not belong to the site as a patient
  - Changing the MSH segment in ACK and RSP to conform to national standards
  - DX sites not participating in inventory deduction receive ACK error when lot number not found
  - CAIR patient ID number not populated in PID-3.1

# Release 2.5 Cont'd

- Non-DX items
  - Populate city and county when zip code entered
  - Fixes add vaccine inventory issues such as the ability to change manufacturer
  - Restrict viewing of patient comments based on user roles (only regular and power users)
  - Comment start date will be required when entering patient comments

# CAIR2 Instability

- CAIR has been down almost daily
- CDPH technical team and DXC technical team are working on monitoring the servers and applying a fix
- Affecting DX and manual entry users
- No ETA on when issues will be resolved
- May need to take CAIR down if needed, but will notify everyone via email prior to doing so

# Patient Search Update

- Fix voted on last meeting was applied to CAIR2 on Monday, September 24<sup>th</sup>.
- Release done without CDPH knowledge
- Will work on sending communication out to all users regarding the change
- Change now mimics what is in the training server – when a patient search is done, it takes user to manage patient screen

# Questions?

**Next Meeting:  
October 25, 2018  
1:30 pm**
