# California Immunization Registry Release Notes

## 1. Introduction

The document communicates the major new features and changes in this release of the California Immunization Registry.

## 2. About This Release

This release incorporates the correction of some minor defects discovered during the CAIR Implementation contract period and minor enhancements to the California Immunization Registry software.

## 3. Compatible Products

This product has been tested on the following platforms or with the following products:

CAIR UAT, CAIR TRN, CAIR Production

## 4. Bug Fixes

The following items have been fixed in this release:

1. Corrected phone mapping from data exchange messages. Cell phone numbers will now properly populate the cell phone field in CAIR2. Previously, all numbers were loaded in the home phone field.
2. If an address is received in a data exchange message that is not the patients current address, the address will now be updated. Previously, no updates were made to address.

## 5. New Features

The following new features appear in this release:

1. **CAIR2 will now accept ADT (Admit-Discharge-Transfer) messages via HL7 data exchange**
  1. Used to update patient demographic data
